welcome you to try out my healing track, Alpha Magic.

Probably, you are aware, that human brain produces different patterns of electrical activity that can be recorded in the form of waves on electro-encephalograph.

These waves are called alpha, beta, and delta etc. When we are immersed in deep contemplative or meditative mood, our brain shows dominance of alpha waves. This track, Alpha Magic is designed to train your brain to go into alpha state, particularly the frequency of 10Hz.

Here are some general instructions, to derive maximum benefits of Alpha Magic. The duration of this track, is 25 minutes. You may listen this track anytime of the day, but do not try this track while driving or working on any machine. You should not listen to this track if you are using a pace-maker or have history of epilepsy. Also you are requested to discontinue listening this track if you feel any physical or emotional discomfort.

While listening to this track, do not make any special efforts and keep your eyes closed to cut visual distractions. The track is intended for personal use, and therefore, you should use a good pair of headphones or earphones and avoid using speakers. If you start dreaming, just be passive and do not make any efforts to stop the dreams. In the deep meditative state, conscious mind gives away its control to sub-conscious mind, and lot of valuable information may come up in the form of sudden flashes of insights, solutions to problematic situations etc. If you listen to this track before sleeping, then you may notice profound changes in the quality of your sleep. By learning to go into alpha state, apart from healing benefits, you can also develop and use instinctive wisdom.

If you find this effort useful then you may share this track with your friends.
